

Validation vs Creation

Sergio Revilla
@elreplicante

based on Martin Tschischauskas (@martynasc) slides

One more validation

custom ActiveRecord validations

```
validate :from_date_is_before_to_date
```

```
def from_date_is_before_to_date  
  if from_date.to_i > to_date.to_i  
    errors.add(:from_date, "can't be after to date")  
  end  
end
```

Executes custom validation method

Exercise #27

Add the following validations to the model `Visit`:

1. `from_date` in the future
2. `from_date` before `to_date`

- Hint: `Time.now`
